DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

2. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-2, drawn to a method of detecting the matrix metalloproteinase-1 Ets transcription factor binding site single nucleotide polymorphism.

Group II, claim(s) 3, drawn to a kit comprising a means for detecting matrix metalloproteinase-1 Ets transcription factor binding site single nucleotide polymorphism.

Group III, claim(s) 4, drawn to a method of identifying potential therapeutic agents for treatment by determining an agent's ability to inhibit binding of matrix metalloproteinase-1 Ets transcription factor binding site single nucleotide polymorphism.

Group IV, claim(s) 5, drawn to a method of treating patients with an agent which inhibits binding of a transcription factor.

3. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons. The technical feature which appears to link each of the inventions appears to be the matrix metalloproteinase-1 Ets transcription factor binding site single nucleotide polymorphism.

The prior art teaches a DNA sequence of the MMP-1 which only contained 1G at position -1607 (Rutter et al. J. Cell Biochem. 66, pages 322-336 1997).

The full length gene, a sequencer, a hexamer mix, a label would all be means for detecting matrix metalloproteinase-1 containing the Ets transcription factor binding site single nucleotide polymorphism in a patient. Therefore, the means would not be a special technical feature which linked each of the groups.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Jeanine Goldberg whose telephone number is (571) 272-0743. The examiner can normally be reached Monday-Friday from 7:00 a.m. to 4:00 p.m.
If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion, can be reached on (571) 272-0782.
